

NetQ Professional

NetQ Professional is a queue management system design to handle heavy loads of queue and it is fully customizable to customer's need. Build on a modular structure, NetQ professional allows us to integrate with customer's system if needed. NetQ with Appointment Booking System, NetQ with CRM, NetQ with JustPrint 8 are possible. Our team will be able to coordinate with your vendors to complete the project with full satisfaction.

If you do not need customization, NetQ Professional comes with a comprehensive package to meet your advanced needs. We have advanced system that comes with Feedback Tablets, SMS Features, Counter Displays, Touch Screen Kiosks and more

NetQ Professional Controller NetQ-Pro

NetQ Professional controller is a windows based controller being the brain of the entire NetQ Basic System. It receives and compute all the data sent by the peripherals and store it into its internal database.

All settings and reports are configured and retrieved using Webadmin page from the system. Webadmin page can be accessed using browser operated from Laptop, Desktop or Tablet.

THERE ARE 3 CORE FUNCTIONS OF WEBADMIN BASIC:

- 1 STATUS MONITOR FUNCTION**
Allows users to monitor the live status of the queue
- 2 SETTINGS FUNCTION**
Allows users to do settings for Service Type, Counters, Ticket Dispenser, Users, Webdisplay or WebTV_Display.
- 3 REPORTS FUNCTIONS**
Allows users to retrieve Audit Trial Report, Service Report, Waiting Time Report, Service Time Report, Productivity Report, Queue Ticket Report, User Report
